## PROFILE

I established Artstop Studios in 2005 and am based in York. My national public art portfolio has been honoured with a number of national design awards including the Building Better Healthcare Awards and Society for British Interior Design Awards. My practice focuses on the integral design of permanent art features, working closely with architects and client teams from the pre-planning stages to overall project completion. My artworks are characterised by striking graphics, innovative use of a range of materials and a keen attention to detail. I engage with clients throughout each project to encourage an open exchange of ideas and shared ownership.
